

PECB Certified ISO 14001 2026 Foundation

Become acquainted with the best practices of Environmental Management Systems (EMS) based on ISO 14001

Why should you attend?

This course provides a comprehensive overview of ISO 14001 and its key elements, including environmental aspects and impacts, risks and opportunities, operational controls, emergency preparedness and response, internal audits, management reviews, and continual improvement of the EMS. Participants will gain a solid understanding of the requirements of an EMS, enabling them to contribute to its effective implementation, maintenance, and continual improvement, while supporting environmental performance and compliance with applicable requirements.

Upon completion of the training course, participants can sit for the certification exam. After successfully passing the exam, they can apply for the “Certificate Holder in ISO 14001:2026 Foundation” credential, which demonstrates their foundational knowledge of ISO 14001 requirements and its application within an EMS.
